

BEFORE THE OIL AND GAS CONSERVATION COMMISSION
OF THE STATE OF COLORADO

IN THE MATTER OF THE PROMULGATION) CAUSE NO. 421
AND ESTABLISHMENT OF FIELD RULES TO)
GOVERN OPERATIONS IN THE HEREFORD) DOCKET NO. 1211-SP-108
FIELD, WELD COUNTY, COLORADO)

APPLICATION

EOG Resources, Inc. ("EOG" or "Applicant"), by and through its attorneys, Burleson LLP, respectfully submits this Application to the Oil and Gas Conservation Commission of the State of Colorado (the "Commission") for an order: (1) vacating the drilling and spacing unit established for certain portions of Section 13 and Section 24, Township 12 North, Range 64 West, 6th P.M., and the approximate 640-acre drilling and spacing unit established for Section 25, Township 12 North, Range 64 West, 6th P.M., for the production of oil, gas and associated hydrocarbons from the Niobrara Formation; and (2) establishing an approximate 1,300-acre stand-up exploratory drilling unit consisting of certain lands located in said Sections 13, 24 and 25, for horizontal and vertical well development, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation. In support of its Application, Applicant states and alleges as follows:

1. Applicant is a corporation duly authorized to conduct business in the State of Colorado, and has registered as an operator with the Commission.
2. Applicant owns substantial leasehold interests in the below-listed lands:

Township 12 North, Range 64 West, 6th P.M.

Section 13: Lots 1, 2, 3, and 4 (that portion of the section within Colorado - approximately 18.98 acres)

Section 24: All

Section 25: All

These lands are hereinafter referred to as the "Application Lands." A map depicting the acreage comprising the Application Lands is attached hereto and marked as Exhibit A.

Vacating the Established 640-Acre Drilling and Spacing Units

3. On or about October 21, 2010, the Commission entered Order No. 421-3, which, among other things, established 640-acre drilling and spacing units for certain lands, including Sections 24 and 25, Township 12 North, Range 64 West, 6th P.M., and approved one horizontal well for each unit, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation, with the surface location for each horizontal well to be located anywhere upon the drilling and spacing unit, provided that the horizontal leg into the Niobrara Formation shall not be closer than 600 feet to the outside boundary of the drilling unit and the terminus of the horizontal leg shall not be any closer than 600 feet to the outside boundary of the drilling and spacing unit, without exception being granted by the Director.

4. On or about February 22, 2011, the Commission entered Order No. 421-7, which, among other things, combined Lots 1, 2, 3, and 4 (approximately 18.98 acres) of Section 13, Township 12 North, Range 64 West, 6th P.M., with Section 24, Township 12 North, Range 64 West, 6th P.M. (approximately 640 acres), to create one drilling and spacing unit, and continued to approve one horizontal well within the unit, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation.

5. Applicant herein requests the establishment of an approximate 1,300-acre exploratory drilling unit for the Application Lands for horizontal and vertical well development, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation, and by so doing, it is necessary to vacate the drilling and spacing units previously established for the Application Lands. At present, one horizontal well is authorized for each existing 640-acre drilling and spacing unit; however, by establishing an approximate 1,300-acre exploratory drilling unit, additional wells (either horizontal or vertical) may be drilled which will allow the Niobrara Formation underlying the Application Lands to be more efficiently and economically drained without promoting waste of the resource.

Establishment of the 1,300-acre Stand-up Exploratory Drilling Unit

6. The geologic strata subject to this request for unitization as an exploratory drilling unit is the Niobrara Formation, found at a depth of 6,667 feet below ground surface in the Jake #2-01H Well, API #05-123-30574, whose surface location is in the SE¼ NW¼ of Section 1, Township 11 North, Range 63 West, 6th P.M., and known to be a common source of supply.

7. Applicant requests the Commission establish the Application Lands as an approximate 1,300-acre stand-up exploratory drilling unit for the Niobrara Formation pursuant to Rule 503.b.(1) and §34-60-116(2), C.R.S. For the Application Lands, the proposed exploratory drilling unit is not smaller than the maximum area that can be economically and efficiently drained by the wells proposed to be drilled under this Application and completed in the Niobrara Formation.

8. Applicant requests it be authorized to drill and complete one or more horizontal wells in the approximate 1,300-acre stand-up exploratory drilling unit for the Application Lands, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation, as necessary to economically and efficiently recover resources, while minimizing surface impacts, creating efficiencies for drilling and production, increasing the ultimate recovery of the reserves, preventing waste, and protecting correlative rights.

9. In addition to the proposed horizontal wells, Applicant requests it be authorized to drill and complete one or more new vertical or directional wells in the approximate 1,280-acre stand-up exploratory drilling unit for the Application Lands, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation, as necessary and for those same reasons set forth in Paragraph 8.

10. Applicant states that wells to be drilled under this Application, whether horizontal, vertical or directional, should be drilled from a new, common or existing well pad,

with no more than one well pad per quarter quarter section, without exception being granted by the Director.

11. Applicant states that for any permitted wells to be drilled under this Application, the bottomhole location or, in the case of horizontal wells, the treated intervals of the wellbore, should be not less than 600 feet from the outer boundary of the proposed exploratory drilling unit and not less than 460 feet from any other well or treated interval of a well producing from the Niobrara Formation, without exception being granted by the Director.

* * *

12. The granting of this Application is in accord with the Oil and Gas Conservation Act, found at §34-60-101, *et seq.*, C.R.S., and the Commission rules.

13. That the names and addresses of the interested parties (owners within the proposed exploratory drilling unit) according to the information and belief of the Applicant are set forth in Exhibit B attached hereto. The Applicant shall submit a certificate of service for the Application within the seven days as required by Rule 503.e.

WHEREFORE, Applicant respectfully requests that this matter be set for hearing, that notice be given as required by law and that upon such hearing this Commission enter its order:

A. Vacating the drilling and spacing unit established for certain portions of Section 13 and Section 24, Township 12 North, Range 64 West, 6th P.M., and the approximate 640-acre drilling and spacing unit established for Section 25, Township 12 North, Range 64 West, 6th P.M., for the production of oil, gas and associated hydrocarbons from the Niobrara Formation.

B. Establishing an approximate 1,300-acre stand-up exploratory drilling unit for the Application Lands, for horizontal and vertical well development, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation.

C. Requiring that any permitted wells to be drilled under this Application, whether horizontal, vertical or directional, should be drilled from a new, common or existing well pad, with no more than one well pad per quarter quarter section, without exception being granted by the Director.

D. Requiring that any permitted wells to be drilled under this Application, the bottomhole location or, in the case of horizontal wells, the treated intervals of the wellbore, should be not less than 600 feet from the outer boundary of the proposed exploratory drilling unit and not less than 460 feet from any other well or treated interval of a well producing from the Niobrara Formation, without exception being granted by the Director.

E. For such other findings and orders as the Commission may deem proper or advisable in the premises.

DATED this 14th day of September, 2012.

Respectfully submitted,

EOG RESOURCES, INC.
