LOCATED IN SECTIONS 15 AND 16, TOWNSHIP 5)
SOUTH, RANGE 64 WEST, ARAPAHOE COUNTY,)
COLORADO)

CAUSE NO. 535

DOCKET NO. 1303-SP-_____

VERIFIED APPLICATION

ConocoPhillips Company ("ConocoPhillips") by and through its attorneys, Lohf Shaiman Jacobs Hyman & Feiger PC, respectfully submits its Verified Application to the Oil and Gas Conservation Commission of the State of Colorado (the "Commission") for an order establishing an approximate 1,280-acre spacing unit for production of oil, gas and associated hydrocarbon substances, applicable to the drilling and producing of horizontal wells to the Niobrara Formation, and establishing related well location rules covering certain lands in Arapahoe County, Colorado, and in support states as follows:

1. ConocoPhillips is a Delaware corporation duly organized and authorized to conduct business in the State of Colorado.

2. ConocoPhillips owns certain oil and gas leasehold interests in the following lands in Arapahoe County, Colorado (the "Application Lands"):

Township 5 South, Range 64 West of the 6th P.M.
Sections 15 & 16

3. The Application Lands are unspaced with respect to the Niobrara Formation, and are subject to Rule 318.a, which among other things provides that a well to be drilled in excess of 2,500 in depth shall be located not less than 600 feet from any lease line, and shall be located not less than 1,200 feet from any other producible or drilling oil or gas well when drilled to the same source of supply, unless authorized by order of the Commission upon hearing.

4. The records of the Commission reflect that no wells are currently producing nor have they previously produced from the Niobrara Formation in the Application Lands. Several wells have been drilled and abandoned to the "J" Sand Formation in the Application Lands, and Renegade Oil & Gas Company, LLC currently operates the State B #1 Well (API #05-005-06660) in the SE/4SW/4 of Section 15 of the Application Lands, which has produced from the "D" Sand Formation.

5. To promote efficient drainage of the Niobrara Formation in the Application Lands, to protect correlative rights, avoid waste, and assure the greatest ultimate recovery of oil, gas and associated hydrocarbon substances from the formation, the Commission should establish a

spacing unit of approximately 1,280-acres, consisting of the Application Lands, applicable to the drilling and producing of horizontal wells to the Niobrara Formation.

6. ConocoPhillips requests an order allowing it to drill and complete one horizontal well, with the option to drill a second horizontal well in a 1,280-acre spacing unit consisting of the Application Lands. The proposed horizontal wells shall be drilled in the spacing unit, with the completed interval of such wells in the Niobrara Formation no closer than 460 feet from the boundaries of the spacing unit, regardless of the lease lines within the unit, and no closer than 920 feet from the completed interval in another well producing from the same source of supply.

7. The proposed spacing unit, and well location rules established in the requested order would be applicable to the drilling and production of horizontal wells only, with vertical and directional wells to the Niobrara formation remaining subject to Commission Rule 318.a. or such other orders as may be entered by the Commission.

8. The above-proposed drilling and spacing unit will allow efficient drainage of the Niobrara Formation, prevent waste, not adversely affect correlative rights of any owner, and assure the greatest ultimate recovery of oil, gas and associated hydrocarbon substances from the reservoirs.

9. A drilling and spacing unit for horizontal wells of the size and shape specified above is not smaller than the maximum area which can be economically and efficiently drained by a single horizontal well to the Niobrara Formation in the proposed unit.

10. The proposed wells can be developed in a manner consistent with protection of the environment, public health, safety and welfare.

11. The names and addresses of interested parties according to the information and belief of ConocoPhillips are set forth in the annexed **Exhibit A**. The undersigned certifies that copies of this Verified Application shall be served on each interested party as required by Rule 503.e.

WHEREFORE, ConocoPhillips respectfully requests this matter be set for hearing, notice be given as required by law, and upon such hearing this Commission enter its order:

A. ~~Establishing the Application Lands as an approximate 1,280-acre drilling and spacing unit for production of oil, gas and associated hydrocarbons from horizontal wells to the Niobrara Formation, and allowing the drilling of up to two horizontal wells in the unit.~~

B. Providing that the treated interval of the proposed horizontal wells shall be no closer than 460 feet from the boundaries of the unit, regardless of the lease lines within the unit, and not less than 920 feet from the completed interval of another well producing from the same source of supply.

C. For such other findings and orders consistent with the requests set forth above which the Commission may determine to be just and proper.

RESPECTFULLY SUBMITTED this 21st day of January, 2013.
