

**BEFORE THE OIL AND GAS CONSERVATION COMMISSION  
OF THE STATE OF COLORADO**

IN THE MATTER OF THE OBJECTION OF  
EXTRACTION OIL & GAS, INC. TO GREAT  
WESTERN OPERATING COMPANY, LLC'S  
FOURTEEN RULE 318A PROPOSED  
HORIZONTAL WELLS AND HORIZONTAL  
WELLBORE SPACING UNITS, LOCATED ON  
SECTIONS 2 AND 11, TOWNSHIP 6 NORTH,  
RANGE 67 WEST, 6<sup>TH</sup> P.M., AND SECTION 35,  
TOWNSHIP 7 NORTH, RANGE 67 WEST, 6<sup>TH</sup>  
P.M., IN THE CODELL AND NIOBRARA  
FORMATIONS, WELD COUNTY, COLORADO

CAUSE NO.

DOCKET NO.

**APPLICATION FOR HEARING ON RULE 318A OBJECTION**

Pursuant to Colorado Oil and Gas Conservation Commission ("Commission") Rule 503.b.(10)., Extraction Oil & Gas, Inc. ("Extraction") requests that the Commission schedule a hearing during its regularly scheduled September meeting to consider Extraction's objection dated July 24, 2014 ("Objection") to Great Western Operating Company, LLC's ("Great Western's") fourteen (14) proposed horizontal wells ("Proposed Wells") and horizontal wellbore spacing units ("Proposed WSUs") (collectively, the "318A Proposals"), covering All of Section 2 and the N/2N/2 of Section 11, Township 6 North, Range 67 West, 6<sup>th</sup> P.M., and the S/2S/2 of Section 35, Township 7 North, Range 67 West, 6<sup>th</sup> P.M., in the Codell and Niobrara Formations, Weld County, Colorado ("318A Proposal Lands"). A copy of the Objection, including exhibits detailing the 318A Proposals, is attached hereto as Exhibit A.

Affected Interest

1. Extraction is a Colorado corporation authorized to conduct business in the State of Colorado and is a registered operator in good standing with the Commission.
2. Extraction owns a significant leasehold interest in the 318A Proposal Lands.

Factual and Legal Basis for the Hearing Request

3. On June 27, 2014, Great Western sent notices of the 318A Proposals to Extraction pursuant to Commission Rule 318A.e.(6).
4. On July 24, 2014, Extraction timely submitted its Objection to the 318A Proposals. As the Objection explained, Extraction owns significant leasehold interests in the 318A Proposal Lands, including 100% of the leasehold interest in the SW/4 of Section 2, Township 6 North, Range 67 West, which many of Great Western's proposed wellbores will pass through. Extraction intends to pursue its own drilling operations that

will promote greater ultimate recovery of oil and gas, and reduce cumulative surface impacts for the 318A Proposal Lands.

5. Extraction's Objection identified the following deficiencies with the 318A Proposals:

- A. Great Western does not own a mineral interest in the mineral estate through which the wellbores of the Proposed Wells will pass.
- B. Great Western's Proposed Wells and Proposed WSUs will cause waste;
- C. Great Western's Proposed Wells and Proposed WSUs will adversely affect the correlative rights of Extraction in the Application Lands;
- D. Great Western's Proposed Wells will cause a trespass to the SW/4 of Section 2, Township 6 North, Range 67 West; and
- E. Great Western's Proposed Wells and Proposed WSUs will unnecessarily cause cumulative surface impacts.

6. Pursuant to Commission Rule 318A.e.(6)C, Great Western may request a hearing on the Objection, but Great Western has not done so.

7. Extraction desires to resolve this matter promptly in order to pursue its own drilling operations covering the 318A Proposal Lands. Extraction's plans for such operations are detailed as part of the Objection attached as Exhibit A, including plats for such drilling operations attached as exhibits thereto. As compared with Great Western's 318A Proposals, Extraction's development plans will prevent waste, promote greater ultimate recovery of oil and gas, protect correlative rights and reduce cumulative surface impacts for the 318A Proposal Lands.

8. Pursuant to Commission Rule 503.b.(10), "persons who can demonstrate that they are directly and adversely affected or aggrieved by the conduct or oil and gas operations or an order of the Commission and that their interest is entitled to legal protection under the [Oil and Gas Conservation] Act..." may seek relief from the Commission on any matter not specifically described in Commission Rule 503.b. Extraction owns significant leasehold interests in the 318A Proposal Lands which are entitled to legal protection under the Oil and Gas Conservation Act. Extraction has been directly and adversely affected and aggrieved by the 318A Proposals for the reasons set forth in its Objection, as well as the delay and uncertainty caused by Great Western's failure to respond to Extraction's Objection.

#### Intended Presentation and Proposed Witnesses

9. Extraction intends to present factual and legal information regarding the issues raised in its Objection related to Great Western's 318A Proposals, including the ownership of the relevant leasehold interest, engineering issues related to correlative

rights, waste and effective drainage of the Codell and Niobrara formations, and any other relevant issues.

10. Extraction anticipates calling the following witnesses: Allyson Vistica, a landman for Extraction Oil & Gas, Inc.; Matt Owens, a geologist for Extraction, and John Tonello, an engineer for Extraction. Extraction also reserves the right to call additional witnesses, including witnesses needed for impeachment or rebuttal.

Time Estimate

11. Extraction estimates that it will need approximately one hour to present its Objection, exclusive of any cross-examination by Great Western or questions by the Commissioners.

Requested Relief

12. Pursuant to Commission Rule 503.b.(10) and based on the foregoing, Extraction respectfully requests that the Commission set this matter for hearing during its regularly scheduled September meeting.

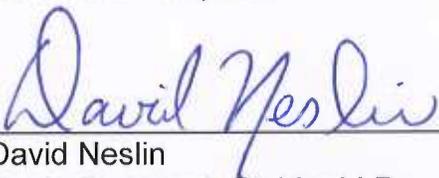

WHEREFORE, Extraction respectfully requests that this matter be set for hearing during the Commission's regularly scheduled September meeting.

DATED this 20 day of August 2014.

Respectfully submitted:

**Extraction Oil & Gas, Inc.**

Great Western Oil & Gas Company  
Attn: Mr. K. Wade Pollard  
Senior Landman  
1801 Broadway, Suite 500  
Denver, Colorado 80202

Re: Objection to Great Western Well Proposals

Mr. Pollard:

In response to the fourteen (14) notices described on Exhibit A and Exhibit B, received from Great Western Oil & Gas Company ("GWOG") on behalf of its affiliate Great Western Operating Company, LLC ("GWOC"), and pursuant to Colorado Oil and Gas Conservation Commission ("Commission") Rule 318A.e.(6)B, Extraction Oil & Gas, Inc. ("Extraction") submits this objection ("Objection"). The notices listed on Exhibit A include those seven (7) proposed wells ("S/2 Proposed Wells") with wellbores penetrating through the Codell formation in the S/2 of Section 2, Township 6 North, Range 67 West, hereafter referred to as Section 2 ("S/2 Proposals"), and the notices listed on Exhibit B include those seven (7) proposed wells ("N/2 Proposed Wells") with wellbores penetrating through the Codell formation in the N/2 of Section 2 ("N/2 Proposals"). Plats for the S/2 Proposals are detailed in Exhibit C, and plats for the N/2 Proposals are detailed in Exhibit D. The S/2 Proposed Wells and the N/2 Proposed Wells are collectively referred to as the "Proposed Wells", and the S/2 Proposals and the N/2 Proposals are collectively referred to as the "GWOC Proposals".

### **Introduction and Summary**

Extraction is an "owner" for purposes of Commission Rule 318A.e.(6)B, as it owns significant leasehold interests in the lands affected by the GWOC Proposals. This Objection is timely submitted within thirty (30) days of June 27, 2014, the date on which GWOG sent notices of the GWOC Proposals to Extraction.

As outlined by Commission Rule 318A.e.(6)B, Extraction objects to the GWOC Proposals on the grounds (i) that GWOC is not an "owner" in the mineral estate through which the wellbores of the S/2 Proposed Wells will pass; (ii) that the GWOC Proposals will cause waste to occur; and (iii) that the GWOC Proposals will adversely affect the correlative rights of Extraction. In addition, many of the Proposed Wells (iv) will cause a trespass to the SW/4 of Section 2 and (v) the GWOC Proposals will needlessly increase cumulative surface impacts in this densely populated area.

Furthermore, Extraction intends to propose twenty-five (25) horizontal wells for the Codell formation, covering lands in Section 2 and Section 3, Township 6 North, Range 67 West, hereafter referred to as Section 3 ("*Extraction Plan*"). The surface locations for such proposed wells will be located in the W/2 of Section 3 and such proposed wells will produce from approximately two (2) mile lateral wellbores extending west to east with bottom hole locations in the E/2 of Section 2. The Extraction Plan is detailed in Exhibit D attached.

### **Factual and Legal Basis for the Objection**

The specific factual and legal basis for this Objection is as follows:

#### **GWOC is Not an Owner in the Mineral Estate Through Which the Wellbores of the S/2 Proposed Wells Pass.**

1. The S/2 Proposed Wells will be drilled from a surface location in the SE/4 of Section 3. The wellbores of the S/2 Proposed Wells will extend from west to east from surface locations in the SE/4 of Section 3 through the S/2 of Section 2, with an entry point into the Codell formation approximately 460 feet to the east of the western boundary section line for Section 2, and a bottom hole location approximately 470 feet to the west of the eastern boundary section line for Section 2, as described in Exhibit C.

2. Accordingly, the wellbores of the Proposed Wells will penetrate through the target Codell formation in the SW/4 of Section 2.

3. Extraction owns one-hundred percent (100%) of the leasehold interest in the SW/4 of Section 2. GWOC does not own any interest in the mineral estate of the SW/4 of Section 2, including the targeted Codell formation.

4. Commission Rule 318A.e.(6)B provides grounds for objection where the operator proposing a horizontal well or horizontal wellbore spacing unit is not "an 'owner', as defined in the Act, of the mineral estate(s) through which the wellbore penetrates within the target formation."

5. Under the Commission Rules, an "owner" is defined as "the person who has the right to drill into and produce from a pool and to appropriate the oil or gas produced therefrom either for such owner or others or for such owner and others, including owners of a well capable of producing both oil or gas, or both." Commission Rules 100 Series, Definitions.

6. However, Commission Rule 318A.e.(6)B further qualifies the term "owner" with the requirement that ownership include "the mineral estate(s) *through which the wellbore penetrates* within the target formation" (emphasis added). This means that an operator must own an interest in the mineral estate within the target formation through which the wellbore penetrates, not just an interest in the pool.

7. By definition, as to the S/2 Proposals GWOC is not an "owner" in the mineral estate through which the wellbores of the S/2 Proposed Wells will penetrate within the target formation.

#### **The GWOC Proposals will Cause Waste**

8. As discussed above and detailed in Exhibit C and Exhibit D, the entry point for each of the Proposed Wells into the Codell formation is approximately 460 feet east of the western boundary section line for Section 2, in accordance with the requirements under Commission Rule 318A.a.(4)D. Because the Proposed Wells will only produce from a one mile lateral leg, there will be "stranded" acreage of 460 feet on either side of the section line in order to comply with Commission Rule 318A.a.(4)D. This stranded acreage of 460 feet on either side

of the section line, totaling 920 feet for the length of the Section 2 western section line, will eliminate production from approximately 111 acres of the Codell formation under the GWOC Proposals.

9. In contrast, the proposed wells under the Extraction Plan will produce from a two (2) mile lateral leg. This will allow Extraction to produce from the approximate 111 acres of stranded Codell formation, while complying with Commission Rule 318A.a.(4)D.

10. Accordingly, the wellbores of the proposed wells under the Extraction Plan will provide greater exposure to the target Codell formation within Section 3 and Section 2.

11. Further geologic evidence and testimony will demonstrate that the Extraction Plan will result in a greater ultimate recovery of hydrocarbons from the Codell formation as to the affected lands.

### **The GWOC Proposals will Adversely Affect the Correlative Rights of Extraction**

12. The GWOC Proposals will adversely affect the correlative rights of Extraction by diluting the ultimately recoverable hydrocarbon interest of Extraction. As discussed above, the GWOC Proposals will eliminate production from approximately 111 acres of the Codell formation straddling the Section 2 western section line. This unproductive acreage will reduce the ultimate recovery of hydrocarbons from the affected lands, including those hydrocarbons attributable to Extraction's leasehold interest. This, in turn, will adversely affect Extraction's correlative rights.

13. Furthermore, under the GWOC Proposals, an approximately 80-acre tract comprised of the SE/4NE/4 and the SE/4SE/4 of Section 4 would be left "stranded". Extraction owns 100% of the leasehold interest in this stranded 80-acre tract, and under the GWOC Proposals, Extraction will be left with no reasonable spacing alternative to develop this stranded acreage.

14. Thus, the correlative rights of Extraction are adversely affected by the GWOC Proposals.

### **The S/2 Proposed Wells will Cause a Trespass to the SW/4 of Section 2**

15. As discussed above and detailed in Exhibit C, the entry point into the Codell formation for the S/2 Proposed Wells is located in the SW/4 of Section 2, while the surface locations for the S/2 Proposed Wells are located to the west in the SE/4 of Section 3. Additionally, as detailed in Exhibit D, the entry point into the Codell formation for the Bower FD 02-162HN well is located in the NW/4 of Section 2, while the surface location for the Bower FD 02-162HN is located in the SE/4 of Section 3.

16. Accordingly, the wellbores of the S/2 Proposed Wells, as well as the wellbore of the Bower FD 02-162HN well, will penetrate through the SW/4 of Section 2 in order to reach the target Codell formation.

17. As discussed above, Extraction owns 100% of the leasehold interest in the SW/4 of Section 2, and GWOC does not own an interest in surface or mineral estate in the SW/4 of Section 2. Therefore, the wellbores of the S/2 Proposed Wells and the Bower FD 02-162HN well will cause a trespass to the SW/4 of Section 2.

### **Cumulative Surface Impacts**

18. Additionally, under the GWOC Proposals multiple surface locations will be necessary in order to produce from the S/2 of Section 2 and the S/2 of Section 3.

19. The Commission's Rules and policies seek to reduce cumulative surface impacts whenever possible, especially in populated areas. Commission Rule 604.c(2)E.i concerning mitigation measures for proposed wells within a Designated Setback Location, provides: "Where technologically feasible and economically practicable, operators shall consolidate wells to create multi-well pads, including shared locations with other operators. Multi-well production facilities shall be located as far as possible from Building Units." Commission Rule 1002.d also provides: "Where feasible, operators shall use directional drilling to reduce cumulative impacts and adverse impacts on wildlife resources."

20. The Extraction Plan only requires a single surface location in order to produce from the S/2 of Section 2 and the S/2 of Section 3. The Extraction Plan demonstrates that it is feasible for an operator to reduce cumulative surface impacts through the use of longer laterals in the area. The need for additional surface locations under the GWOC Proposals will increase surface impacts and the potential for adverse impacts.

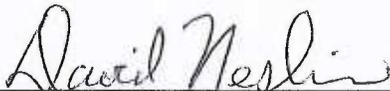

### **Conclusion**

For the reasons stated above, Extraction objects to the GWOC Proposals. If this matter proceeds to hearing, Extraction intends to present factual and legal information regarding the issues discussed above. Extraction's witnesses will address the ownership of the relevant leasehold interest, engineering issues related to correlative rights, waste and effective drainage of the Codell formation, and any other relevant issues. We invite you to discuss these issues further and request that you withdraw the GWOC Proposals so that we may work towards a mutually agreeable solution.
