NOTICE OF HEARING

TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

Rule 318.a. of the Rules and Regulations of the Oil and Gas Conservation Commission requires that wells drilled in excess of 2,500 feet in depth be located not less than 600 feet from any lease line, and located not less than 1,200 feet from any other producible or drilling oil or gas well when drilling to the same common source of supply, unless authorized by order of the Commission upon hearing. Section 4, Township 6 North, Range 61 West, 6th P.M. is subject to this rule for the Niobrara Formation.

On August 8, 2011, the Commission adopted Rule 318A(l).a.(4)D., which, among other things, requires a horizontal wellbore spacing unit to be designated for each proposed horizontal well located within the Greater Wattenberg Area ("GWA"). The horizontal wellbore spacing unit may be of different sizes and configurations depending on the lateral length and orientation of the wellbore but is to be comprised of the governmental quarter-quarter sections in which the wellbore lateral penetrates the productive formation as well as any governmental quarter-quarter sections that are located less than 460 feet from the portion of the wellbore lateral that penetrates the productive zone regardless of section or quarter section lines. Section 4, Township 6 North, Range 61 West, 6th P.M. is subject to this rule for the Niobrara Formation.

On January 5, 2012, EOG Resources, Inc. ("EOG" or "Applicant"), by its attorneys, filed with the Commission a verified application ("Application") for an order to establish an approximate 640-acre drilling and spacing unit for the below-described lands ("Application Lands"), to accommodate the planned Greasewood #01-04H Well, a horizontal well, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation, with the treated interval of the permitted wellbore to be located no closer than 600 feet from the boundaries of the proposed unit:
