TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

On February 22, 2011 (Corrected April 4, 2013), the Commission entered Order Nos. 407-779 and 535-4 which, among other things, established 74 approximate 640-acre drilling and spacing units, and approved one horizontal well within each unit, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation. Section 34, Township 6 North, Range 62 West, 6th P.M. is subject to this Order for the Niobrara Formation.

On April 27, 1988, the Commission adopted Rule 318A which, among other things, allowed certain drilling locations to be utilized to drill or twin a well, deepen a well or recomplete a well and to commingle any or all Cretaceous Age Formations from the base of the Dakota Formation to the surface. Rule 318A supersedes all prior Commission drilling and spacing orders affecting well location and density requirements of Greater Wattenberg Area wells. On December 5, 2005, Rule 318A was amended, among other things, to allow interior infill and boundary wells to be drilled and wellbore spacing units to be established. On August 8, 2011, Rule 318A was again amended, among other things, to address drilling of horizontal wells. Section 34, Township 6 North, Range 62 West, 6th P.M. is subject to this Order for the Codell Formation.

On December 2, 2013, Bill Barrett Corporation ("BBC" or "Applicant"), by its attorneys, filed with the Commission pursuant to §34-60-116, C.R.S., a verified application ("Application") for an order to approve an additional seven horizontal wells, for up to eight horizontal wells, within an approximate 640-acre drilling and spacing unit established for the below-described lands ("Application Lands"), for the production of oil, gas, and associated hydrocarbons from the Niobrara Formation, with the productive interval of the wellbore to be located no closer than 460 feet from the unit boundaries, and no closer than 250 feet from the productive interval of any other wellbore located in the unit; and 2) establish an approximate 640-acre drilling and spacing unit for the Application Lands, and approve up to four horizontal wells within the unit, for the production of oil, gas, and associated hydrocarbons from the Codell Formation, with the productive interval of the wellbore to be located no closer than 460 feet from the unit boundaries, and no closer than 250 feet from the productive interval of any other wellbore located in the unit, without exception being granted by the Director:
