CERTAIN LANDS IN TOWNSHIP 1)	
SOUTH, RANGE 66 WEST AND)	
TOWNSHIP 1 NORTH, RANGE 66 WEST,)	
6TH P.M., WATTENBERG FIELD, WELD)	
AND ADAMS COUNTIES, COLORADO.)	

APPLICATION

Petro Operating Company LLC ("Applicant"), Operator No. 10583, by and through its attorneys, Welborn Sullivan Meck & Tooley, P.C., respectfully submits this Application to the Oil and Gas Conservation Commission of the State of Colorado ("Commission") for an order establishing an approximate 960-acre drilling and spacing unit and establishing well location rules applicable to the drilling of wells and producing of oil, gas, and associated hydrocarbons from the Codell and Niobrara Formations covering certain lands in Weld and Adams Counties, Colorado. In support of its Application, Applicant states as follows:

1. Applicant is a limited liability company duly authorized to conduct business in Colorado.

2. Applicant owns leasehold interests in the following lands ("Application Lands"):

Township 1 South, Range 66 West, 6th P.M.
Section 3: All

Township 1 North, Range 66 West, 6th P.M.
Section 34: S½

A reference map of the Application Lands is attached hereto.

3. On February 19, 1992, the Commission entered Order No. 407-87 (Amended), which established 80-acre drilling and spacing units for the production of oil and/or gas from the Codell-Niobrara Formations underlying lands in Adams, Boulder,

Jefferson, Larimer, and Weld Counties. The Order allows for dual completion and downhole commingling as to both oil and gas in the Codell-Niobrara Formations. The Application Lands are subject to this Order.

4. On November 16, 1992, the Commission entered Order No. 499-15, which established 320-acre drilling and spacing units for certain lands for production from the Dakota Formation, provided for procedures to obtain exceptions to the permitted well locations, and allowed the recompletion and downhole commingling of production from the Dakota, "J" Sand, Codell, Niobrara, Sussex, and Shannon Formations. The Application Lands are subject to this Order.

5. On April 27, 1998, the Commission adopted Rule 318A, the Greater Wattenberg Area Special Well Location, Spacing and Unit Designation Rule (amended on December 5, 2005 by Order 1R-100) which established locations to drill to any Cretaceous formation and to commingle production from any formation between the base of the Dakota formation and the surface.

6. On August 8, 2011 the Commission further amended Rule 318A to, among other things, address the drilling of horizontal wells and require that a horizontal wellbore spacing unit must include any governmental quarter-quarter section located less than 460 feet from the completed interval of the wellbore lateral. The Rule does not, however, prohibit the establishment of drilling and spacing units within the Greater Wattenberg Area.

7. The Codell and Niobrara Formations are common sources of supply under the Application Lands.

8. To promote efficient drainage of the Codell and Niobrara Formations within the Application Lands and to avoid waste, the Commission should establish an approximate 960-acre drilling and spacing unit covering the Application Lands described below for production of oil, gas, and associated hydrocarbons from the Codell and Niobrara Formations:

Township 1 South, Range 66 West, 6th P.M.

Section 3: All

Township 1 North, Range 66 West, 6th P.M.

Section 34: S½

9. Applicant is requesting to drill and complete up to twenty-four (24) horizontal wells in the approximate 960-acre drilling and spacing unit described above, for production of oil, gas, and associated hydrocarbons from the Codell and Niobrara Formations.

10. Applicant further requests that the treated interval of each wellbore be no closer than 150 feet from the treated interval of any other wellbore producing from

the Codell and Niobrara Formations within the unit, and no closer than 460 feet from the unit boundary, without exception being granted by the Director.

11. Applicant maintains that the above-proposed drilling and spacing unit, increased well density, and modified setbacks will allow efficient drainage of the Codell and Niobrara Formations, will prevent waste, will not adversely affect correlative rights of owners within the proposed unit or of adjacent lands, and will assure the greatest ultimate recovery of oil, gas, and associated hydrocarbons from the Codell and Niobrara Formations. Accordingly, Applicant requests authority to drill only those wells necessary to determine the well density which allows the most efficient drainage of the Codell and Niobrara Formations, prevents waste, does not adversely affect correlative rights, and assures the greatest ultimate recovery of oil, gas, and associated hydrocarbons from the Codell and Niobrara Formations. The proposed drilling and spacing unit is not smaller than the maximum area that can be economically and efficiently drained by the authorized wells in such drilling and spacing unit.

12. Applicant further requests that the wells be drilled from no more than one (1) well pad within the unit or from a legal location on adjacent lands.

13. The names of the interested parties according to the information and belief of the Applicant are set forth in Exhibit A attached hereto and made a part hereof, and the undersigned certifies that copies of this Application shall be served on each interested party within seven (7) days after filing of the application as required by Rules 503.e. and 507.b.1.

WHEREFORE, Applicant respectfully requests that this matter be set for hearing, that notice be given as required by law and that, upon such hearing, this Commission enter its order consistent with Applicant's proposals as set forth above.

Dated this 19th day of January, 2017.

Respectfully submitted,
WELBORN SULLIVAN MECK & TOOLEY, P.C.
