

Changes to eForm 6 and eForm 4 – Submittal by “Other” Operator

12-12-2013

The eForm system has been changed to accommodate the submittal of Form 6s and Form 4s by an operator *other* than the operator of record. Submittal of Form 6s and Form 4s by the re-plugging “other” operator is required by the Re-enter to Re-plug Option #3 of the DJ Basin Horizontal Offset Policy.

The eForm wizard to create and submit a Form 6 now has a “Replug by Other Operator” check box to allow the replugging “other” operator to create and submit the Form 6s – both the Notice of Intent to Abandon and the Subsequent Report of Abandonment.

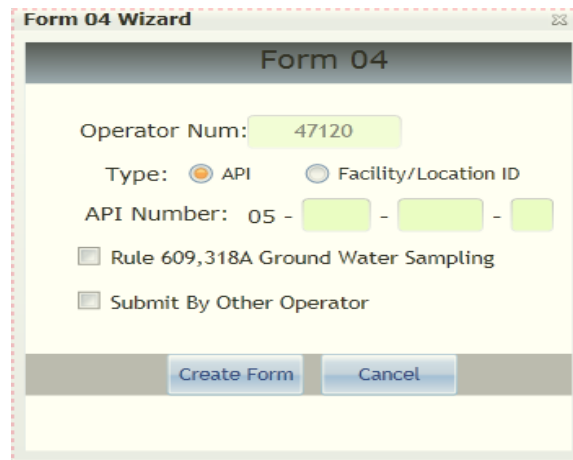

The screenshot shows the 'Form 06 Wizard' window. It has a title bar 'Form 06 Wizard' and a header 'Form 06'. The main area contains the following fields and options:

- Operator Num: 47120
- API Number: 05 - [] - [] - []
- Form 6 Type: Notice of Intent Abandon, Subsequent Report of Abandonment
- Replug By Other Operator

At the bottom, there are two buttons: 'Create Form' and 'Cancel'.

The eForm wizard to create and submit a Form 4 now has a “Submit by Other Operator” check box to allow the re-plugging “other” operator to create and submit the Form 4s to report the start of final reclamation and the completion of final reclamation.

The screenshot shows the 'Form 04 Wizard' window. It has a title bar 'Form 04 Wizard' and a header 'Form 04'. The main area contains the following fields and options:

- Operator Num: 47120
- Type: API, Facility/Location ID
- API Number: 05 - [] - [] - []
- Rule 609,318A Ground Water Sampling
- Submit By Other Operator

At the bottom, there are two buttons: 'Create Form' and 'Cancel'.

This new eForm feature should only be used for the Re-enter to Re-plug Option 3 of the DJ Basin Horizontal Offset Policy.
