13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Based on the results of 3-D seismic investigations, Kinder Morgan proposes to drill a new lateral from the DC-2 per the attached directional plat into Federal Mineral Lease # COC15396. The existing pad will be utilized, and no additional surface disturbance will be necessary. There will be a drill rig on location for three to four weeks; flowlines area already in place; there will be no need to improve the existing access road; drill cuttings will be kept in steel containers, hauled off site, and disposed of at the Montezuma County Solid Waste Facility.
