NOXIOUS WEEDS - Bull thistle, Canada thistle, and Common mullein were found in areas along the access road where disturbance has occurred. Develop a weed control plan to control weeds along the access road during the reclamation process.	CostaR	12/15/2014
See Final Reclamation Rules of 1004. Implement stormwater erosion controls and control weeds. Remove piles of wood debris. Recontour and reclaim the access road as soon as practicably possible. Reclamation should be performed by the next growing season, (spring of 2015). Provide a detailed reclamation plan that includes a timeline of the reclamation process.	CostaR	12/15/2014

## **ACTION REQUIRED**

**ANY ACTION REQUIRED** items listed on this report indicate that the oil and gas facility or the oil and gas operations listed on the report may be in violation of the rules and regulations of the Colorado Oil and Conservation Commission (“COGCC”) and corrective action is required.

There is reasonable cause to believe that a violation of the Oil and Gas Conservation Act, or of any rule, regulation, or order of the Commission, or of any permit issued by the Commission, has occurred. The Operator’s compliance with this Inspection Report is required to resolve these alleged violations. This document requires the Operator to timely respond to the COGCC and to comply with directives as listed by the **Corrective Action Deadline Date**. Failure to do so will result in the issuance of a Notice of Alleged Violation and initiation of enforcement proceedings in which COGCC will seek monetary penalties for the alleged violations pursuant to § 34-60-121, C.R.S. and Rule 523, COGCC Rules of Practice and Procedure, 2 CCR 404-1. (Please note that the COGCC's penalty authority was recently increased to a maximum of \$15,000 per day and penalties are no longer capped at a maximum of \$10,000 per violation.)
