

## Memorandum

To: Well File

From: Mark Weems, P.E.  
Regional Engineer - SW Colorado

Date: 7/06/2015

Subject: Note to File

---

This project should have never been included in the PRAW Program. It was later learned during the MIRU operations to plug the well that the contractor and the COGCC project manager determined that the Chapman #1 had actually been previously plugged by the operator and the well identified for plugging by previous inspections was in actuality a water well.
