---

Good Afternoon,

We had a State Reportable Release at the location listed below due to volume of impacted soil removed. A leak was discovered in an oil dump line from the separator to the partially buried produced water vessel during maintenance activities at the location. Remediation efforts are currently in progress at the location. Work to date will be summarized in a forthcoming Form 19 Initial Release Report. Please let me know if you have any questions. Thank you,

Mayer Et Al-62N65W/33NESE

Location ID: 328384
