Hi Doug,

The 2A indicates this location is within a floodplain. The box was incorrectly marked and the location is NOT in a floodplain. Could you please make this change, or send it back to draft so I can? This has also been confirmed with Troy Swain.

Thanks!

Venessa,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

- 1) As you requested, I have revised the Form 2A to indicate this proposed Oil & Gas Location is NOT in a floodplain.
- 2) You have indicated that the existing Schaumburg #1 and Schaumburg #12-17 will produce to the proposed production facilities. On your Facility Layout Drawing you show there will be 20 Oil Tanks, 10 Separators, and 9 Burners/ECDs/VOC Combustors. However, in the Facilities section you have listed 21 Oil Tanks, 11 Separators, and 10 Burners/ECDs/VOC Combustors. Is the one additional Oil Tank, Separator, and Burner/ECD/VOC Combustor listed coming from the existing small production facility located to the northwest next to the Schaumburg #1 well? I assumed since those two existing wells would produce to this proposed production facility, that small existing production facility would be removed. If that is the case, where are the one additional Oil Tank, Separator, and Burner/ECD/VOC Combustor coming from and do you need to revise your Facility Layout Drawing to depict them?
- 3) Now that the Public Comment period has ended for this Form 2A, please send me a letter certifying PDC Energy's compliance with COGCC Rule 306.e. If any meetings and/or consultations took place, please also indicate so and what their outcome was.

Please reply to this correspondence by March 23, 2016. If you have any questions, please contact me. Thank you.

Venessa,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) As you requested, I have revised the Form 2A to indicate this proposed Oil & Gas Location is NOT in a floodplain. [Thank you!!](#)

2) You have indicated that the existing Schaumberg #1 and Schaumberg #12-17 will produce to the proposed production facilities. On your Facility Layout Drawing you show there will be 20 Oil Tanks, 10 Separators, and 9 Burners/ECDs/VOC Combustors. However, in the Facilities section you have listed 21 Oil Tanks, 11 Separators, and 10 Burners/ECDs/VOC Combustors. Is the one additional Oil Tank, Separator, and Burner/ECD/VOC Combustor listed coming from the existing small production facility located to the northwest next to the Schaumberg #1 well? I assumed since those two existing wells would produce to this proposed production facility, that small existing production facility would be removed. If that is the case, where are the one additional Oil Tank, Separator, and Burner/ECD/VOC Combustor coming from and do you need to revise your Facility Layout Drawing to depict them? [Attached is the updated scaled facility drawing showing the facilities matching the 2A. The existing small facility will be placed on this new facility.](#)

3) Now that the Public Comment period has ended for this Form 2A, please send me a letter certifying PDC Energy's compliance with COGCC Rule 306.e. If any meetings and/or consultations took place, please also indicate so and what their outcome was. [Attached](#)

Please reply to this correspondence by March 23, 2016. If you have any questions, please contact me. Thank you.
