**2** CA# 124806

Corrective Action: Stormwater and erosion controls including, but not limited to revegetation are needed to stabilize erosion within the project area. Areas needing revegetation (described above) need to be stabilized with erosion controls until vegetation is established and erosion is stabilized. Erosion and stormwater controls need to be selected and installed using good engineering practices such as those recommended by CDOT in their erosion control manuals. Stormwater controls and revegetation need to be monitored and maintained.
