Operator used all the topsoil during interim reclamation activities. If the Operator salvages all topsoil from the disturbance areas, there should be enough topsoil to facilitate future final reclamation activities.

Comment

Operator has performed interim reclamation activities to reduce disturbance areas only needed for production operations. COGCC staff will have to perform a future inspection to evaluate vegetative compliance, as this is cropland.

Operator shall continue to monitor and manage this site until the location meets Rule 1003 standards, including stormwater and weed management.
