CORRECTIVE ACTIONS:

1 CA# 126780

Corrective Action: Repair/replace erosion control blanket, additional slope stabilization measures are needed on all well pad cut-slopes.

Date: 08/09/2019

Response: CA COMPLETED

Date of Completion: 08/28/2019

Operator Comment: Erosion blankets installed in 2017 have a 18-month life span. After 18 months the blankets are designed to decompose - this is what the blankets did this season. They stabilized the slope and allowed some more vegetation to grow. However, the biodegradable blankets have been removed and hydromulch has been added to aid in slope stabilization. See attached photos.

COGCC Decision: Approved pending re-inspection

COGCC
Representative:

Photos indicate that temporary slope stabilization measures are installed in response to corrective action.
