**General Comment:**

Pit Spill Inspection.

Produced water spilled from NE corner of east pit berms due to an animal hole. Spill then ran SE through winter wheat field then directly south into fallow wheat field ~1 mile. Observed pit water level had dropped ~3 ft and pit is ~220'x110'. Backhoe operator was on location at time of inspection filling in the hole in the berm. Inspector contracted operator by phone and asked operator to check and maintain berms for other animal holes that were observed in the pit berms at the time of inspection. Inspector contacted COGCC EPS also on 2/28/2020. See attached photos.

Form 19 I was in process on 2/28/2020. Corrective action is to contact COGCC EPS.
