General Comment:

On 3/24/2020 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

- Revegetation needs to be conducted in portions of the interim reclamation area with poor revegetation by 4/30/2020.
- Erosion and stormwater controls need to be installed on bare/weedy soils until stabilized with desirable vegetation by 4/30/2020.

See below, and attached photos for additional detail.

VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment Little to no desirable vegetation observed over significant portions of the interim reclamation area.

Corrective Action Revegetation needs to be conducted in portions of the project area with little desirable vegetation. See stormwater below for details on erosion control. Monitoring of revegetation, weeds, and stormwater is needed to ensure proper reclamation. Documentation of monitoring may be requested.
