**General Comment:**

On 3/31/2020 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Stabilization measures are needed along the access road to prevent degradation and track-out by 4/30/2020.

See below, and attached photos for additional detail.

Comment	Vegetation is grazed within the interim reclamation area, grasses are present. Livestock exclusion may be needed if vegetative cover is not increasing over time. Weeds appear to be controlled, although it is early in the growing season and weeds may not be observable. Monitoring and maintenance is needed throughout the growing season to prevent weed establishment and encourage desirable revegetation.

Comment:	A portion of the access road near the access entrance is ponding and deep mud is resulting in expansion of road width and rutting.				
Corrective Action:	Stabilization measures are needed along the access road to prevent degradation and track-out by 4/30/2020.
