General Comment:

On 8/25/2020 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Stormwater and erosion controls are needed to stabilize erosion on the well pad cutslope by 9/30/2020.

See below, and attached photos for additional detail.

Comment Weeds appear to be controlled at this time. Revegetation is not progressing on well pad cut slopes, which are largely bare soils. See "Stormwater" below. Fill slopes appear to be revegetating.

Comment:		Well pad cut-slopes are largely bare soils that are rilling with sedimentation observed at the toe of slope.				Date: 09/30/2020
Corrective Action:		Stormwater and erosion controls are needed to stabilize erosion on the well pad cutslope. Stormwater controls need to be selected, sized, installed, and maintained using good engineering practices such as those described in CDOT manuals for erosion control. These controls need to be maintained in good condition until the cut-slope is stabilized with desirable perennial vegetation.				
Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT
