General Comment:

On 10/22/2020 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Bare soils on fill slopes remain unstabilized. Erosion controls need to be installed and maintained until bare soils are stabilized with desirable perennial vegetation. Corrective action is back-dated to 9/6/2019.

See below, and attached photos for additional detail.

-Operator submitted FIR Resolution Form documents operator's response to corrective actions identified during a 2019 reclamation inspection. This inspection has determined that corrective action is partially addressed, additional action is needed.
