General Comment:

Reinspection, passed except for stuffing box leak at wellhead (see attached photo). Tank as south end of pit has metal berms and animal holes were fixed on south pit berms. Produced water tank labels on east side of tank batteries were also checked. Produced water is running into pit at the 3 produced water tanks outlet, out of pit into south fiberglass tank and then out into pasture through the pipe from the south tank. Injection well was not injecting at this time.
