COMMENTS:

Renegade requests approval of alternative MIT for the Colorado State C#3 as allowed for by Rule 326.b(3) after Director consideration of any equivalent test or combination of tests.
Renegade believes the Colorado State C#3 demonstrates mechanical integrity due to a 12/30/2019 bradenhead test (Doc #402275941) performed showing no bradenhead pressure and tubing/casing pressure of 0/72 psi coupled with a 10/22/2020 bradenhead test (Doc #402524052) conducted showing no bradenhead pressure and tubing/casing pressure of 0/85 psi. The Colorado State C#3 was completed with a DV tool at 1522' and cemented with 300 sacks of lite cement. If the well lacked integrity old drilling mud would kill the well and casing pressure would disappear. Well pressures including the bradenhead will be monitored monthly to ensure integrity.
This well is SI as a result of the Third Creek Gas Gathering System shutdown on 6/1/2018 and was producing at the time of SI. The Colorado State C#3 was produced utilizing conventional rod pumping equipment.

Operator Comments:

This Form 4 is being filed for the Colorado State C#3 in response to a need for an alternative MIT approval to satisfy a COGCC rule to conduct MITs on wells SI longer than two years. Other Renegade wells with similar circumstances have had Form 4's previously approved. Conversations with Diana Burn of the COGCC coupled with the well's circumstances has led to the belief that this filing is ripe for approval.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Signed: _____ Print Name: Edward Ingve
Title: Manager/Owner Email: ed@renegadeoilandgas.com Date: 3/5/2021

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: Jacobson, Eric Date: 3/12/2021

CONDITIONS OF APPROVAL, IF ANY:
