COMMENTS:

Renegade requests approval of alternative MIT for the State of Colorado #3-33 as allowed for by Rule 326.b(3) after Director consideration of any equivalent test or combination of tests.
Renegade believes the State of Colorado #3-33 demonstrates mechanical integrity due to a 11/4/2018 bradenhead test (Doc #401822727) performed showing negative 2 psi bradenhead pressure and tubing/casing pressure of 1/375 psi, a 12/23/2019 bradenhead test (Doc #402273780) conducted showing no bradenhead pressure and tubing/casing pressure of 0/235 psi coupled with a 12/8/2020 bradenhead test (Doc #402564040) conducted showing no bradenhead pressure and tubing/casing pressure of 0/43 psi. The State of Colorado #3-33 was completed with surface casing to 2463' protecting all fresh water zones. If the well lacked integrity old drilling mud would kill the well and casing pressure would disappear. Well pressures including the bradenhead will be monitored monthly to ensure integrity. The well has been intermittently swabbed since being drilled and then SI afterwards. It is now scheduled to be fracture stimulated in the coming weeks.
This well is SI as a result of the Third Creek Gas Gathering System shutdown on 6/1/2018 and was drilled anticipating tying into that system. The State of Colorado #3-33 will now be produced utilizing conventional rod pumping equipment and use onsite electrical generation equipment for any gas production.

Operator Comments:

This Form 4 is being filed for the State of Colorado #3-33 in response to a need for an alternative MIT approval to satisfy a COGCC Warning Letter (Doc #402628775) dated 3/15/2021. Other Renegade wells with similar circumstances have had Form 4's previously approved. Conversations with Diana Burn of the COGCC coupled with the well's circumstances has led to the belief that this filing is ripe for approval.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
