INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

After the fire at the tire windbreak was extinguished by covering the tires with soil, the tire debris and approximately 144 cubic yards of soil was hauled to a landfill on 1/16/2021.

REMEDIAL ACTION PLAN

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Soil in the impacted area will be scraped and contained in a tarp or roll off. Soil impacted by tire windbreak fire will be hauled to a local landfill.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

If the proposed plan is approved by the COGCC, the soil removal will commence on 4/6/2021. The operator will remove impacted soil outside the fenced area and also inside the fence where the tire windbreak was formerly located. An independent contractor will conduct at least 2 soil samples in the impacted area along with at least 1 background sample. The results of soil samples are expected to be received during the week of 4/12. After receipt of the soil samples, assuming table 915-1 levels are satisfactory, the operator will formulate a reclamation plan for the impacted area. The surface tenant has requested that the operator replace the windbreak. The operator will replace top soil and conduct seeding operations at the impacted site prior to erecting the replacement windbreak, which will be constructed with metal pipe.
