General Comment:

On 4/20/2021 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Stormwater controls need to be installed to stabilize erosion within the project area by 5/15/2021.

See below, and attached photos for additional detail.

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment Interim reclamation areas are seeded and hydromulched. Revegetation remains sparse, although it is early in the growing season at the time of this inspection. Operator needs to monitor revegetation throughout the 2021 growing season.

Storm Water:						
Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Comment:		Erosion is occurring where stormwater is discharged from the southeastern portion of the well pad. Cobble BMP and wattles are not functioning here as stormwater flows around the cobble and over the wattle, discharging sediment from the project area.				Date: 05/15/2021
Corrective Action:		Stormwater BMPs need to be installed to stabilize erosion within the southeastern project area. BMPs need to be installed according to good engineering practices such as those described by CDOT in their erosion control manuals.				
Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT
