#### COMMENTS:

Renegade requests approval of alternative MIT for the Champlin 569 Amoco E#5 as allowed for by Rule 326.b(3) after Director consideration of any equivalent test or combination of tests.  
Renegade believes the Champlin 569 Amoco E#5 demonstrates mechanical integrity due to a bradenhead pressure test (Doc #402645638) performed showing no bradenhead pressure and tubing/casing pressure of 21/31 psi. The Champlin 569 Amoco E#5 was completed with a SS tool at 1654' and 2000 gallons of casing gel to protect the fresh water zones. If the well lacked integrity old drilling mud would kill the well and casing pressure would disappear. Well pressures including the bradenhead will be monitored monthly to ensure integrity.  
This well is SI as a result of the Third Creek Gas Gathering System shutdown on 6/1/2018 and was producing at the time of SI. The Champlin 569 Amoco E#5 was produced with gas flowing up the casing.

**Operator Comments:**

This Form 4 is being filed for the Champlin 569 Amoco E#5 in response to a need for an alternative MIT approval to satisfy a COGCC rule to conduct MITs on wells SI longer than two years. Other Renegade wells with similar circumstances have had Form 4's previously approved. This well is subject to Warning Letter #402628775. Conversations with Diana Burn of the COGCC coupled with the well's circumstances has led to the belief that this filing is ripe for approval.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
