FIELD INSPECTION FORM

Loc ID 325310 Inspector Name: ROY, CATHERINE On-Site Inspection 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

OGCC Operator Number: 31250
Name of Operator: FRITZ & DIGMAN INC
Address: PO BOX 70024
City: ALBUQUERQUE State: NM Zip: 87197-

Findings:

- 2 Number of Comments
- 1 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

General Comment:

On 5/5/2021 Catherine Roy conducted a followup reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Corrective action for stabilization of the access road is not adequately addressed. Grading activity smoothed the ruts and road surface but does not address stabilization issues. Loose soils pushed to the roadside are not stabilized in piles and will rapidly erode. Grading cut on backslopes are not stable. As access is graded below grade, stormwater flows will drain to the road and channelize and pond. Further stabilization measures are needed to address these issues. Corrective action date: 5/31/2021

See attached photos for additional detail.

Inspected Facilities

Facility ID: 214538 Type: WELL API Number: 067-06141 Status: PR Insp. Status: RI

Reclamation - Storm Water - Pit

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: -Corrective action for stabilization of the access road is not adequately addressed. Grading activity smoothed the ruts and road surface but does not address stabilization issues. Loose soils pushed to the roadside are not stabilized in piles and will rapidly erode. Grading cut on backslopes are not stable. As access is graded below grade, stormwater flows will drain to the road and channelize and pond. Further stabilization measures are needed to address these issues.

Corrective Action: Stabilization measures are needed to address loose soils, unprotected backslopes, and prevent issues from road surface graded below ground elevation. New corrective action date is issued. Corrective action date: 5/31/2021

Date: 05/31/2021

Pits: NO SURFACE INDICATION OF PIT
