General Comment:

COGCC Inspection Report Summary

On Tuesday 5/11/2021 at approximately 1000, I, Inspector Scott Ramsey, conducted a follow up inspection at TEP Burkle A, at Location # 335540 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Also location is within or in close proximity to the 411 water protection area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of a tracking pad at time of inspection. Some C/A's from past TWO previous inspections documents # 700701965 and 700702239 have NOT been completed. Therefore C/A dates will remain the same as the previous inspection.

Inventory on location remains the same as previous inspection.

During this inspection the following compliance issues were observed:

1. Location still shows signs of lack of stabilization/compaction (C/A Date 1/6/2021)
2. Erosion and sediment migration behind tank batteries and at drain/sediment trap needs maintained from previous inspection. (C/A Date 1/6/2021)

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
