Comment:

The equipment and debris has been removed from the location. It does not appear reclamation was performed as there are areas of the location with no vegetation growth. The region has received ample spring moisture and the surrounding undisturbed vegetation is green and growing well so vegetation should be establishing more at the location if reclamation was properly performed. It is unknown if there are soil issues preventing establishment. The soils and vegetation should be evaluated and additional reclamation performed by the upcoming fall season.

Corrective Action: **Comply with 1004 Rules.**
