Comment: The location has been recontoured and pits are closed. There is predominately undesirable weed growth throughout the location. The desirable vegetation is not progressing and additional reclamation is needed to establish a desirable vegetation cover. The undesirable weeds will need to be controlled during the growing season and the location should be reseeded by the upcoming fall season.

COGCC Comments

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed the CRP mix used for the surrounding field. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	CostaR	06/14/2021
