VEGETATIVE COVER FAIL

Comment:

The desirable vegetation has not uniformly reestablished to be at least 80% cover of reference area levels. There are areas of the location that contains mostly undesirable weeds consisting of Kochia, Flixweed, and Cheat grass. There are also areas with inadequate vegetation cover shown by drone aerial photos and vegetation cover data. The undesirable and noxious weeds will need to be controlled and the location will need to be evaluated for additional reseeding in the fall season. The location must be monitored and maintained to ensure reclamation progresses toward compliance.

Corrective Action:

Comply with 1004 Rules.
