General Comment:

On 7/2/2021 Catherine Roy conducted a followup reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Clean and properly dispose of green plastic netting within the northern and northeastern project area. Corrective action is back-dated to 2/28/2018 to document the duration of non-compliance and potential penalties if enforcement is pursued.

-Stormwater erosion run-on controls are not functioning within the northern and northeastern project area, and is an ongoing compliance issue. Erosional rilling and sediment deposition also observed within the northwestern project area. Install stormwater (ie: BMPs) and erosion controls (mulch, biodegradable erosion blankets, etc.) to stabilize erosion within the project area. Corrective action is back-dated to 2/28/2018 to document the duration of non-compliance and potential penalties if enforcement is pursued.

-Revegetation needs to be conducted in portions of the project area with little desirable vegetation, especially within the project fill slopes. Operator needs to monitor and manage revegetation to ensure success. Livestock exclusion may be needed until vegetation is established as grazed vegetation was observed. Corrective action date: 8/15/2021.

See below, and attached photos for additional detail.

Comment:	-Stormwater erosion run-on controls are not functioning within the northern and northeastern project area, and is an ongoing compliance issue. Erosional rilling and sediment deposition also observed within the northwestern project area.					Date: 02/28/2018
Corrective Action:	Install stormwater (ie: BMPs) and erosion controls (mulch, biodegradable erosion blankets, etc.) to stabilize erosion within the project area. Stormwater and erosion controls need to be selected, sized, installed, and maintained according to good engineering practices, and until location is stabilized with desirable perennial vegetation. Corrective action is back-dated to 2/28/2018 to document the duration of non-compliance and potential penalties if enforcement is pursued.					

Pits: ☒ NO SURFACE INDICATION OF PIT
