General Comment:

On 10/22/2021 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Stormwater and erosion controls need to be installed to stabilize erosion and prevent sediment discharge, by 11/25/2021. Stormwater and erosion controls need to be selected, sized, installed, and maintained according to good engineering practices such as those described by CDOT in their erosion control manuals

See below, and attached photos for additional detail.

Overall Final Reclamation _____ Well Release on Active Location ☐ Multi-Well Location ☐

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: Erosional rilling and channeling is occurring on well pad cut and fill slopes.

Corrective Action: -Stormwater and erosion controls need to be installed to stabilize erosion and prevent sediment discharge, by 11/25/2021. Stormwater and erosion controls need to be selected, sized, installed, and maintained according to good engineering practices such as those described by CDOT in their erosion control manuals. Controls need to be installed and maintained until soils are stabilized with desirable perennial vegetation.

Date: 11/25/2021

Pits: ☒ NO SURFACE INDICATION OF PIT
