**General Comment:**[COGCC Inspection Report Summary](#)

On Monday 11/8/2021 at approximately 1000, I, Inspector Scott Ramsey, conducted a routine inspection at TEP RMV 38-17, at Location # 335271 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of tracking pad at time of inspection.

During this inspection the following compliance issues were observed:

1. Load lines are missing bull plugs/caps
2. Quad unit horizontal separators includes 2 glycol storage tanks, storage vessels contain no labeling to specify capacity or chemical hazard information.
3. Location shows signs of lack of stabilization/compaction.
4. Tunneling is present through berm near separators.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
