1003 f. Weeds Noxious weeds? F

Comment COGCC staff performed a reclamation inspection along portions of the crude oil transfer line. It doesn't appear the Operator is performing the required weed management, as unmanaged Russian thistle was observed throughout. The northwestern and southeastern portion is predominately all Russian thistle; the southwestern and southern portion did have some desirable vegetation but unmanaged Russian thistle was observed. Refer to the attached inspection photos.

Corrective Action Comply with Rule 1003. Revegetation activities shall be complete no later than 4/1/2022 or as soon as environmental conditions will permit.

Note 1- Operator shall continue to monitor and manage the crude oil transfer line for weeds until additional reclamation activities are performed.

Note 2- Per Rule 1102.f.(3) for flowline and crude oil transfer lines, interim and final reclamation, including revegetation, must be performed in accordance with applicable 1000 Series rules.
