General Comment:

On 1/27/2022 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Stormwater controls need to be installed to stabilize erosion throughout the project area, including all discharge points and areas where concentrated stormwater flows. Stormwater controls need to be selected, sized, installed, and maintained according to good engineering practices. Corrective action date: 4/1/2022. Corrective action date extended to accommodate for winter conditions.

See below, and attached photos for additional detail.
