**General Comment:****COGCC Inspection Report Summary**

On Tuesday 3/10/2022 at approximately 1100, I, Inspector Scott Ramsey, conducted a Follow up inspection at TEP RGU 24-29, at Location # 316480 in Rio Blanco county Colorado.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad.

C/A (Chemical containment full) from previous inspection document # 700703450 has been completed.

Location is snow covered in areas at the time of inspection. Inspector did not access location because of soft/muddy conditions and risk of further degrading pad.

During this inspection the following possible compliance issues were observed:

1. Location shows signs of lack of stabilization/ compaction and degrading.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.

### Location
