Comment:

Based on historic imagery from 4/7/2010 prior to oil and gas operations the parcel and location were associated with other land disturbances. Location pictures submitted as part of the permitting process indicate vegetation appeared to consist of weedy, annual vegetation (e.g., cheatgrass and tumbleweeds).

At the time of this inspection, a List B Colorado noxious weed, Canada thistle, was observed throughout portions of the location. Operator will have to control and manage Canada thistle before the location will be released.

Corrective Action:

Comply with Rule 1004.e. All areas being reclaimed shall be kept as free as practicable of all undesirable plant species designated to be noxious weeds.

Date **09/28/2022**

The corrective date is the date the location was observed out of compliance.
