Comment:

	<p>This location does not comply with Rule 1004. Reclamation rules require reclamation activities to be conducted within twelve months of plugging on non-cropland. Well was plugged 09/28/2017. During this inspection it was observed that the former well location has revegetated to reflect reference area levels but the tank battery location remains out of compliance with 1004 Rules as undesirable vegetation (e.g. predominantly russian thistle) was observed. Additionally, equipment was located on both the tank battery and well locations. Refer to attached inspection photos.</p>	
Corrective Action:	<p>Comply with Rule 1004. Remove all equipment and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p>Corrective action date is the date the location was observed out of compliance.</p>	Date 12/01/2022
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
