Comment

This location was inspected and used for reclamation training purposes. Cereal rye was observed along the southern interim reclamation area which appeared to have gone to seed.

COGCC Staff applied two Conditions of Approval to Form 4 Doc.# 403093820- see COGCC Comments section for more details.

COGCC Comments		
Comment	User	Date
Conditions of Approval for Form 4 Doc.# 403093820: 1) Operator will submit a monitoring report no later than June 1, 2023 via Form 4 Sundry Notice. Operator shall give an estimate of Common rye occurrence both within the location and in the reference areas. Operator will have to provide two consecutive years without any Common rye observed on and off location before the corrective action to control Common rye will be considered complete. 2) COGCC would like additional quadrat samples or vegetation monitoring taken west of Veg4 and Veg5, as this area appeared to have less germination than the remainder of the interim reclamation areas. This area was the last interim rec portion to be reclaimed.	binschusc	02/22/2023
