**General Comment:**

On 9/12/2023, Reclamation Specialists' Aaron Trujillo and Logan Maxwell conducted a Final Reclamation Inspection at Booco's Contract Service Inc's Peltier 11-12

This is a follow-up to inspection #692402573 dated 10/04/2020 to document compliance with the following corrective actions:  
-Final Reclamation.

It was observed in this inspection that the Location remains out of compliance with ECMC Rules and Corrective actions.

The following new compliance issues were observed during this inspection:  
-Stormwater  
-Good Housekeeping

Refer to the "Location", "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable; The "Date of Discovery" is being provided as the corrective action date for all new observed compliance issues. Location will remain out of compliance until corrective action(s) has(have) been resolved and a follow up inspection will be conducted to ensure the compliance issues have been corrected to comply with ECMC rules.

Corrective Action:

Date 11/16/2020

Conduct reclamation in accordance with the ECMC 1004 rules, including re-contouring, stabilizing slopes and installing appropriate BMPs to stabilize the location. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Comply with Rules 1004.e and 606.c and Control all Undesirable and Noxious Plant Species. Ongoing weed monitoring/management required until Location receives a passing final reclamation inspection.

Overall Final Reclamation **Fail** Well Release on Active Location  Multi-Well Location

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: It was observed in this inspection that control measures to manage runoff in a manner that minimizes erosion, degradation and sediment transport are missing or insufficient; cut slopes lack stabilization and degradation is evident; gully erosion due to runoff also observed on the fill slopes.

Corrective Action: Immediately Comply with Rule 1002.f and install or repair required stormwater and erosion control measures. Temporary stormwater and erosion control BMPs will be required until Final Reclamation work is performed, at which point long term control measures will be required to stabilize the seeded soils, until long-term stabilization has been achieved. Continue to monitor and manage stormwater on Location until site receives a passing final reclamation inspection

Date: 09/12/2023

Pits:  NO SURFACE INDICATION OF PIT

**COGCC Comments**

Comment	User	Date
<p><b>RECLAMATION COMMENT</b></p> <p>Inspection #692402573 observed that the Location had not been reclaimed in accordance with 1004 Rules; specifically, anchor equipment has not been removed, gravel/road base has not been removed from the pad, compaction alleviation has not been performed, and the Location had not been recontoured/regraded and reclaimed. Inspection required Operator to comply with 1004 Rules.</p> <p>It was observed in this inspection that corrective actions to reclaim the Location have not been taken; Pad remains compacted and contains gravel; Location has not been recontoured/regraded and slopes lack stabilization (see stormwater); Anchor equipment and Operator sign have not been removed. Trash and ruderal weed debris are present across Location. Noxious weeds, Houndstongue and Canada thistle (List B) remain established on this site.</p>	trujilloam	09/26/2023
