Loc:484360 | Date: 11/21/2023

## Inspection Photos

**Photo 10.** The tap measure shows approximately 6-7 inches of topsoil which was not salvaged at the excavated area of the wellhead or along the flowline trench.

**Photo 11.** Another view of the topsoil horizon shows 6-7" of dark topsoil before rocky subsoils are encountered. Operator failed to salvage topsoil at the location..

## Inspection Photos

**Photo 12.** Facing southwest at the location. The rocky subsoils have been mixed with the topsoil which was not salvaged per the rules.

## Inspection Photos

**Photo 13.** North side of the location facing southwest. The cuttings pile has blown off the blue tarp which was not properly stored and contained.
