Inspection Photos

Photo 1. Facing north along the access road. A recent storm event has created an erosion gully along the roadside which needs to be repaired.

Inspection Photos

Photo 2. Facing back south toward the erosion gully along the roadside which needs to be repaired. A 4.5 ft. shovel shows depth of erosion.

Inspection Photos

Photo 3. The culvert at this drainage crossing has filled in with sediment and debris and must be cleaned out.

Inspection Photos

Photo 4. Facing northeast toward the wellsite. This area near the well will need to be stabilized with vegetation. There was marks in the soil that may have been recently seeded.

Inspection Photos

Photo 5. Facing toward the embankment. This area needs to be seeded for stabilization of the embankment or other BMP may be utilized. Shrubs in the area that are easily established include Rubber rabbitbrush and Four wing salt brush.
