Appears interim reclamation activities have been performed to reduce disturbance areas only needed for production operations. Vegetation throughout the interim areas has not met Rule 1003 standards, consisting of primarily russian thistle and bare soil, and will remain IN-PROCESS. Operator shall continue to monitor and manage this site until the location meets Rule 1003 standards, including stormwater and weed management. Operator shall submit a Form 4 Interim Reclamation Complete notice when the location meets Rule 1003 standards. ECMC may conduct inspections prior to receiving said notice to ensure compliance with Rule 1003.

Comment: Potential stormwater issues with bare soil on slopes across the well location appear to be in the process of repair with evidence of filling in erosion on bare slopes as well as the application of mulch and straw wattles at the location. ECMC staff will inspect again at a later date to confirm the success of installed stormwater BMP's.
