Comment _____

Corrective Action _____

Date _____

1002c. PROTECTION OF SOILS In Process

Comment

Topsoil stockpile appears to have been stabilized with vegetation growing all along it. However the vegetation has been mowed and therefore cannot be evaluated this season and will be re-inspected to determine the success of seeding.

Per Rule 1002.c., all stockpiles shall be protected from degradation due to contamination, compaction and, to the extent practicable, from wind and water erosion during drilling and production operations. Per Rule 1002.c., BMPs to prevent weed establishment and to maintain soil microbial activity shall be implemented.

Refer to inspection photos for details.

Corrective Action _____

Date _____

1002E. SURFACE DISTURBANCE MINIMIZATION _____

Comment _____

Corrective Action _____

Date _____

Unused or unneeded equipment onsite? _____

Comment _____

Corrective Action _____

Date _____

Pit, cellars, rat holes and other bores closed? Fail

Comment

Holes surrounding the topsoil stockpile where a previous sound wall was installed have subsided and are a safety issue on the well location pad.

Refer to inspection photos.

Corrective Action

Comply with Rule 1003.a to backfill sound wall holes.

1003 f. Weeds Noxious weeds? _____

Comment At the date of this reclamation inspection it was noted that interim reclamation processes have yet to begin at the well location as seen in the inspection photos. The last well drilled was 08/13/2019 therefore interim reclamation should have occurred 11/13/2019 putting this location over 4 years out of compliance.

Comments are being continued in the inspector comment section at the end of this report.

Corrective Action ECMC staff is requesting details of operations completed to date since the transfer to Bayswater and planned operations to drill the remaining wells.

Date 01/26/2024

<div style="display: flex; justify-content: space-between;"> <div style="width: 70%;"> <p>Comment: This location does not comply with Rule 1002.f. Rilling along the pad edges on the Western side could cause continued degradation to the location pad. The current installed straw wattle has broken down and is not sufficient to slow flows.</p> <p>In addition the cutslope along the pad have minimal vegetation growth and therefore require more sufficient temporary BMP's until such a time as vegetation is adequate to reduce erosion along the slope.</p> <p>Corrective Action: Install or repair BMP's as well as erosion per Rule 1002.f. in accordance with good engineering practices.</p> </div> <div style="width: 25%;"> <p>Date: 12/26/2023</p> </div> </div>						
Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT						

COGCC Comments

Comment	User	Date
<p>Continued from Interim Reclamation Comment Section:</p> <p>Upon further review the previous operator submitted and withdrew a Form 4 Sundry request for a variance to delay interim reclamation until midstream infrastructure capacities were available to accommodate the original 24 planned wells. The original variance request was withdrawn in accordance with Rules 502 and 503.a to be resubmitted and heard by the Commission through a hearing application, this resubmission has yet to occur.</p> <p>The new operator appears to be planning 11 wells instead of the original 24 and has delayed interim without a new submittal of a variance request to do so.</p>	hansenl	12/29/2023
