Comment	User	Date
<p>Records show well was PA 2014; well was also the source for the 7CSE Domestic Tap #480938.</p> <p>It was observed in this inspection that the Location has met ECMC 1004 Final Reclamation and Revegetation standards.</p> <p>However, records show that the 7CSE Domestic Tap is still "Active".</p> <p>On 6/2/2021, Operator submitted Form 44 #402547692, and though Operator's comments within the Form indicate that the domestic line and equipment has been removed, the Form was submitted to Register the Facility, not close it; Operator will need to submit a subsequent Form 44 to formally close the Facility.</p> <p>It is also noted that the Form 44 submitted does not include accurate Point of Delivery information; specifically, the GPS Locations for the Point of Delivery have not been provided. This information will also need to be submitted within the new Form 44 pursuant to Rule 216..</p> <p>Final Passing of the Location is pending closure of the Domestic Tap facility.</p>	mcdonouc	12/29/2023
