Details of Plan of Work: (State names of and expected depths to objective sands: Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

After drilling well to a depth of 5250' we have not found any of the sands productive so our plans are to plug and abandon the above well according to state regulations as follows:

Will have hold full of good drilling mud, will spot 15 sacks of cement through 4 1/2" drill pipe at bottom of 10 3/4" surface casing which is 412' making plug from 412' to 392', and then placing a bridge plug 20' down from top of surface pipe and fill to top with cement.
