 Hi Melissa,

Not bothersome at all! I have reviewed the standard best management practices and CPW does not have any issues with this proposal. Please let me know if there are any other questions or items that we can assist with.
 Thank you,

Hi Taylor –

Apologies for being bothersome on this one. Could you please review this at your soonest availability? The rig needs to get going on 3/18, and I need to get our submittal sent over to the state for approval.

Thank you so much!

Melissa

Subject: Rule 312 Consultation - GM 923-1D

Good morning, Taylor,

TEP is planning to repair the GM 923-1D well on 3/18/2024.

Under ECMC Rule 312, operators are required to consult with CPW when non-routine maintenance operations are planned, which includes well repairs and plugging operation.

We have included the identified HPHs associated with the location and are planning to begin operations upon approval by ECMC.

As a part of this process, we are required to attach any agreed upon BMPs and correspondence between CPW and the operator documenting consultation. To ensure proper well operations, TEP has proposed the Best Management Practices listed below for implementation during planned activities to minimize potential impacts to wildlife. If additional BMPs are necessary, please let me know.

Well Name	API	Planned Operation	Rule 1202.d Habitats	Rule 1202.c.(1) Habitats	Rule 309.e Habitats	Federal Critical Habitats
GM 923-1D	05-045-18424	Repair	Elk Severe Winter Range Elk Winter Concentration Area Mule Deer Winter Concentration Area Mule Deer Severe Winter Range	Aquatic Sportfish Management Waters	none	none

Associated BMP's

Mule Deer and Elk BMPs

1. Wildlife – Minimization: To minimize the potential for wildlife related traffic accidents, TEP has implemented speed restrictions for all lease roads and requires that all TEP employees and contractors adhere to these posted speed restrictions.
2. Wildlife – Minimization: TEP will make best efforts to minimize operations at these location during winter months by conducting operations, when possible, between 9:00am to 4:00pm when wildlife activity minimal.

Aquatic Sportfish Management Waters / Native Species Conservation Waters

Wildlife – Minimization: Maintain adequate spill response equipment at the Oil and Gas Location during operations.

Please let me know if you have any questions, or if these BMPs are satisfactory, please confirm your agreement with this information in a response that will be included with future submittals.

Thank you,
 Melissa Luke
