REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

An excavation was conducted to remove impacted soil above COGCC Table 910-1 standards in September 2017.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

A propane-powered air sparge system has been deactivated since Q2 2023. The site is being monitored quarterly under static conditions. Should dissolved phase impacts rebound reactivation of the air sparge system will be considered.

An NFA will be requested once four consecutive quarters of groundwater sampling have been completed and reported at the location with concentrations of Table 915 constituents below regulatory limits under static conditions. As needed, soil and/or groundwater remediation plans will be developed and submitted to ECMC in a supplemental Form 27.

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Groundwater will be sampled on a quarterly basis until analytical results are reported with concentrations Table 915-1 analytes below regulatory limits for four consecutive quarters. Eight monitoring wells (MW-1, MW-2RR, MW-3 through MW-6, MW-7R, and MW-8R) are sampled on a quarterly basis to monitor attenuation. Monitoring wells MW-1, MW-2R, MW-3R, MW-4, MW-5, and MW-6 had insufficient water to collect a groundwater sample during the Q2 2023 groundwater sampling event on 4/26/2023. Monitoring well MW-7R had insufficient water to analyze for inorganic constituents in groundwater. Groundwater monitoring wells were sampled and submitted to a laboratory for analysis of Table 915-1 groundwater constituents: Benzene, Toluene, Ethylbenzene, Total Xylenes (BTEX), naphthalene, 1,2,4-Trimethylbenzene, 1,3,5-Trimethylbenzene, Chloride ion, Sulfate ion and Total Dissolved Solids (TDS).
