Section 30: Lots 1 and 2, NE $\frac{1}{4}$, E $\frac{1}{2}$ NW $\frac{1}{4}$ (a/d/a N $\frac{1}{2}$)

APPLICATION

On August 31, 2017, Ursa Operating Company LLC (Operator No. 10447) ("Ursa" or "Applicant") filed a verified application pursuant to §34-60-116, C.R.S., for an order to:

1. Approve the equivalent of one well per 10 acres well density for the Application Lands, for the production of gas and associated hydrocarbons from the Iles Formation (including the Segó Formation) ("Target Formation"), with the bottomhole location of any permitted well located anywhere upon the Application Lands but no closer than 100 feet from the boundaries of the Application Lands, however, in cases where the lands abut or corner lands in respect of which the Commission has not at the time of drilling permit application granted the right to drill 10-acre density Target Formations wells, the permitted wells should be located downhole no closer than 200 feet from the boundaries of the Application Lands, without exception being granted by the Director.

2. Require, except as previously authorized by order of the Commission, wells authorized under this Application to be drilled from the surface either vertically or directionally from no more than one pad per approximately 40 acres, without exception being granted by the Director.

APPLICABLE RULES AND ORDERS

(available online at: <http://cogcc.state.co.us>, under "Regulation,"
then click on "Orders" or "Rules")

- Rule 318.a. of the Rules and Regulations of the Oil and Gas Conservation Commission requires that wells drilled in excess of 2,500 feet in depth shall be located not less than 600 feet from any lease line, and not less than 1,200 feet from any other producible or drilling well in the same formation.
- On March 20, 2006, the Commission entered Order No. 527-1 which, among other things, allowed additional wells to be drilled on lands immediately adjacent to the Application

Lands, and other lands, the equivalent of one well per 10 acres, with the permitted well to be located no closer than 100 feet from the boundary of the lands, for the production of gas and associated hydrocarbons from the Williams Fork Formation.

- On August 28, 2007, the Commission entered Order No. 527-4 which, among other things, amended Order No. 527-2 such that any wells drilled to the Iles and Segó Formations in various lands, including portions of the Application Lands, may be located downhole anywhere upon the applicable lands but no closer than 100 feet from the outside boundary of the lands, unless such boundary abuts or corners lands in respect of which the Commission has not at the time of the drilling permit application granted the right to drill 10-acre density wells for the Iles and Segó Formations, in which event the Iles Formation and Segó Formation wells to be drilled upon the applicable lands shall be drilled downhole no closer than 200 feet from that portion of the boundary which abuts or corners the lands in respect of which 10-acre density downhole drilling for Iles Formation and Segó Formation wells has not been ordered by the Commission.

NOTICE IS HEREBY GIVEN, pursuant to §§ 34-60-101 to -130, C.R.S. and the Commission's Rules of Practice and Procedure, 2 CCR 404-1, that the Commission has scheduled this matter for hearing on:
